Novatex[®] UDK

A Multifunctional product

Demineralising Agent

Dye bath Conditioner

Sequestering Agent ,Dispensing
Agent for hard water salts

Silicate free stabiliser for
Hydrogen Peroxide

Neutralising agent replaces
acetic,formic acid

Easily biodegradable

// APPLICATION OVERLEAF

ADVANTAGES

Novatex UDK is a demineralising agent it forms complexes with calcium, magnesium, iron and prevents catalytic damage to cotton during bleaching of cotton. It thus acts as a protective colloid.

Novatex UDK is a powerful dispersant for water hardening salts and prevents its deposition on the fabric

Novatex UDK works as a stabiliser for hydrogen peroxide bleach process.

Novatex UDK has a buffer action in alkaline conditions.

Novatex UDK replaces acetic acid, formic acid for neutralisation reactions.

Novatex UDK is easily biodegradable.

TECHNICAL SPECIFICATIONS

Appearance	Clear colourless liquid
pH	2 – 3 (INTRINSIC)
Solubility	Excellent

APPLICATION

Novatex UDK for Bleaching :

Novitrol 100*	: 0.5 – 1 % o.w.g
Spectralube Liq*	: 0.5 - 1 % o.w.g
Novatex UDK	: 0.5 – 1.5 % o.w.g
NaOH	: 2 – 4 % o.w.g
Soda Ash	: 1 – 2 % o.w.g

Packing : 50 Kg & 100 Kg HDPE Carboys.

"The information offered in this leaflet is true and accurate to the best of our knowledge but WITHOUT GUARANTEE"

* Novitrol 100 – Wetting Agent , low foaming , APEO Free
Spectralube Liq – Anticrease , lubricant to prevent crease marks during bleaching, dyeing of fabric
