Novastabil 100

Stabilizer for hydrogen peroxide
in bleach liquors
Sequestering properties for
water hardening substances

Introduction :

Novastabil 100 is an organic formulation designed for stabilizing effects on hydrogen peroxide in bleach liquors. Novastabil 100 thus helps to improve whiteness during bleaching of cotton .

Novastabil 100 has sequestering effects on water hardening salts of calcium, magnesium and iron , thus preventing oxidative damage to the fabric , Thus improving whiteness of bleached fabric.

Novastabil 100 has a buffer action during bleach process.

Technical Specifications :

Appearance : Thin Liquid

Colour : Yellowish Liquid

pH : 10 –11

Ionic Nature : Anionic

Compatibility : Compatible with alkaline bleach solutions

Shelf Life : Six months under ideal storage conditions

Application :

Novastabil 100 for Bleaching :

Novitrol 100	: 0.5 – 0.75 %
*Spectralube Liquid	: 0.5 – 0.75 %
*Novastabil 100	: 0.5 - 1 %
NaOH	: 2 – 4 %
Hydrogen Peroxide	: 2 – 5 %

*Spectralube Liq :Anticrease lubricant to prevent crease marks

*Novastabil 100 : Silicate free stabilizer for hydrogen peroxide

Packing : 100 Kg HDPE Carboys
