## Versatil<sup>®</sup> 70 EXT

Powerful levelling agent  
for dyeing of polyester  
with disperse dyes

Low foaming has scouring  
properties

**Introduction :** Versatil 70 EXT is an excellent levelling agent which also acts as a very good penetrating agent especially for 100% polyester , its texturised and blends with viscose , cotton .

---

### Technical Specifications :

Appearance	: Brownish Viscous liquid
Nature	: Anionic
Chemical nature	: Blend of NPEO free surfactants and esters
Solubility in water	: Easily miscible in all proportions
Odour	: Characteristic
Shelf Life	: Six months under ideal conditions

---

### Advantages :

Versatil 70 EXT gives extremely leveled dyeings

Versatil 70 EXT excellent barre' coverage on filament and  
Texturised polyester yarn

Versatil 70 EXT is most suitable for re – levelling of faulty disperse dyeings

Versatil 70 EXT is a very good penetrating agent in case of package and cheese dyeings.

Versatil 70 EXT gives maximum exhaustion and colour yield .

Versatil 70 EXT has scouring and oil dissolving properties thus improves dyeability of substrate.

Versatil 70 EXT is a low foaming product most suitable for High turbulence machines.

---

**Application :**

**For HTHP Dyeing of polyester with disperse dyes :**

Versatil 70 EXT : 0.5 – 1 %

Acetic acid : to maintain pH

Dyes : X Part

Raise temperature to 130 C to complete the dyeing cycle .

**For re-levelling of polyester dyeings :**

Versatil 70 EXT : 2 – 4 gpl

Acetic acid : 1 gpl

Raise temperature to 130 C , hold for 30 – 45 mins .

**Packing :** 100 Kg HDPE Carboys

---

STORE IN COOL DRY PLACE .
